## Collegiate Lions Monthly!

November 2021

*Lead. Achieve. Succeed. Empower!*

### Chancellor Address: Holiday Fever!

Well there is no reason to deny it. Holiday Fever is here and it has hit early college. Around this time students begin to literally day dream about the upcoming breaks. Students start missing assignments, arriving to class a little bit after the tardy bell, and losing focus. It is important that we as stakeholders from the students to myself stay focused. We have a unique opportunity that requires great sacrifices but it is all worth it in the end. Continue to motivate your student(s) through this holiday season. Remember college courses end December 9th so all work should be turned in by December 3rd so students can prepare for finals.

---

## AVID: Focus Note-Taking

A key part of what we do as Collegiate Lions is focused note-taking. This is a strategy that we get from AVID, a program that prepares students to be college and career ready. All grade levels are required to take focused notes in their math class. In addition, sophomores are required to take focused notes in chemistry. While this may seem overwhelming to students, in the long run AVID strategies will be a great tool to get them through our program and their future degrees.

## October's PRIDE! Meeting:

Chancellor Carter took time to have a heart to heart with the Collegiate Lions during October's PRIDE! Meeting. He reset the program by launching his 4 C's for GECHS. These are Community, Communication, Correlations, and Celebrations. Mr. Carter is hoping that by focusing the school on these four areas, GECHS will continue to grow and have even more success!

---

## Collegiate Lion volunteer at Lamar Fall Festival

GECHS students volunteered at Lamar Elementary's Fall Festival on November 6th. As you can see they had a blast! Do you have an event that you would like our assistance with? Just email Mr.Carter (info below) and let him know and we would be happy to help!

## Seniors Spotlited at October's Board Meeting!

Our senior class received certificates for the school board and were recognized for their distinguished achievements. Did you know that our seniors will be the first high school students ever to receive an associate degree in engineering? We are the first program to attempt such a challenging degree and we are excited that our collegiate lions took on the challenge! To date, there is only one other program like ours in the state of Texas!
